## **Executive Summary**

For the past three years, Massachusetts has participated in a national competition for federal infrastructure funding. In November 2021, President Biden signed into law the Bipartisan Infrastructure Law (BIL), which provided unprecedented levels of federal funding for public infrastructure, including transportation projects, clean energy, water and sewer systems, and broadband internet. The BIL also changed the process for how the federal government distributes infrastructure aid, placing a heavy emphasis on “competitive” grant programs. States, municipalities, and other eligible applicants would need to proactively apply for infrastructure funds and the federal government would decide on the winning projects. This represented a shift from the longstanding approach to providing federal aid primarily through “formula funding” programs that guarantee state governments a portion of the total federal aid, based on predetermined factors like state population, land size, and road miles. In August of 2022, the Inflation Reduction Act (IRA) became law and included additional competitive grant programs.

This report will analyze the outcomes of competitive grants supported by the BIL and IRA, through one hundred and thirty-six grant programs, managed by eleven different federal agencies, totaling over \$200 billion in grant funds. To understand Massachusetts’ performance relative to other states, this report shows the location of every dollar awarded from these competitive grant programs. Also, considering the federal government has only awarded about half of the BIL and IRA grant funds to date, this report offers valuable context and insights as Massachusetts continues to pursue infrastructure funding.

This report shows that Massachusetts is performing slightly above average in securing competitive grant funds, ranking 17<sup>th</sup> in the nation in total funding awarded. However, this metric does not capture the Commonwealth’s dramatic improvement in securing funds in the past year. Since October 1, 2023, the Commonwealth ranks 7<sup>th</sup> in the nation for winning federal infrastructure grants, whereas ten months ago, Massachusetts stood at 34<sup>th</sup>.

The data shows that Massachusetts is indeed making a comeback, but the race for competitive infrastructure grants will continue for the next three years. This report provides specific recommendations on the opportunities for Massachusetts to sustain this recent success under the Healey-Driscoll Administration and continue winning federal funding for infrastructure projects that build the future of the Commonwealth.

## A Note on Methodology

Information for this report is gathered from federal agency spending reports, press releases, and dashboard resources made available through [www.Build.gov](http://www.Build.gov) and the Biden-Harris Administration. This includes public announcements about the BIL and IRA made between November 2021 through the two-year anniversary of the Inflation Reduction Act of August 16, 2024. This data aims to evaluate only the federal grant programs where Massachusetts is eligible, so it excludes a limited number of federal infrastructure grant programs that are intended for other parts of the country, such as programs for the Mississippi River Delta region, grants made available through the Denali Commission of Alaska, or grants to restore and protect the Puget Sound area in Washington State.

Also, whenever a grant is awarded for a project that will be spent in multiple states, the total grant award is shown as split between these states (i.e., The Brent Spence Bridge Corridor Project that connects Ohio and Kentucky won a \$1.385 billion grant from the USDOT Bridge Investment Program. For this project in the report, the state charts will show \$692.5 million for Kentucky and \$692.5 million for Ohio.)

This data groups together competitive grant awards by state, so funding shown as awarded to Massachusetts will include grants given to Massachusetts state government, municipalities, independent authorities like the MBTA, Massport etc., as well as and private sector companies located in the Commonwealth.

**This report does not examine any federal formula funding, nor awards from the federal “CHIPS and Science Act,” which do present significant opportunities for state governments.** It is worth noting that the Biden-Harris Administration selected Massachusetts to be the location for a new national hub for the federal Advanced Research Projects Agency for Health (ARPA-H).<sup>1</sup> Massachusetts also won a \$19.7 million grant from the CHIPS Act to establish the “Northeast Microelectronics Coalition Hub” that will support microelectronics needs of the Department of Defense.<sup>2</sup> These are both noteworthy wins for the Commonwealth, but neither are funded through the BIL or IRA competitive grant programs and are therefore not included in the data for funding shown in this report.

A detailed list of all projects awarded in Massachusetts is listed in Appendix A.

## Chapter 1: Key Findings

**Key Finding #1:** Since November 2021, Massachusetts has received almost \$4.3 billion out of \$209.4 billion awarded from the competitive and discretionary grant programs in the Bipartisan Infrastructure Law (BIL) and Inflation Reduction Act (IRA). This represents just over 2% of the total amount awarded to-date to Massachusetts.

According to Census data, Massachusetts is just over 2% of the population in the United States.

**Key Finding #2: Since November 2021, Massachusetts ranks 17<sup>th</sup> of the 50 states in terms of Total Awarded from the BIL and IRA competitive grant programs.**

Below is a list of the total awards to states, with California winning over \$21 billion, Texas over \$13 billion, etc.

<b>Total Awarded State Rank</b>	<b>State</b>	<b>Total Awarded from Grants</b>

**Key Finding #5: There is no relationship between winning competitive grant funding and being a “Swing State” in the 2024 Presidential Election with total awarded since 2021.**

According to the Cook Political Report, there are seven “Swing States” in the upcoming election: Arizona, Georgia, Michigan, North Carolina, Nevada, Pennsylvania, and Wisconsin.<sup>3</sup>

Total Awarded State Rank	State	Total Awarded from Grants
5	Pennsylvania	7,318,872,583
9	Michigan	6,138,041,417
11	North Carolina	5,473,237,550
<b>17</b>	<b>Massachusetts</b>	<b>4,299,580,540</b>

25	Arizona	3,346,043,647
27	Nevada	3,062,869,632
31	Wisconsin	2,856,881,573

Nor is Massachusetts at a disadvantage since October 1, 2023, compared to the “Swing States.”

### US DOT GRANTS AWARDED IN MASSACHUSETTS

**Key Finding #10: Massachusetts’s largest award is for the Sagamore Bridge project, which received a total of \$1.36 billion through two different grant programs, followed by \$335 million for the I-90 Allston Multimodal Project.**

Applicant	Project Name	Awarded Amount
MassDOT	Sagamore Bridge Project - (Bridge Investment Program)	993,122,325
MassDOT	Sagamore Bridge Project - (MEGA Grant)	371,870,542
MassDOT	I-90 Allston Multimodal Project	335,374,775
MA Dept of Energy Resources	Massachusetts’ Solar for All Program	156,120,000
MA Broadband Institute	Broadband Equity, Access, and Deployment (BEAD) program - State Allocation	147,422,464
MBTA	Purchase of new battery-electric buses	116,000,000
MassDOT	Early Actions for the Inland Route Project (West-East Rail)	108,085,280
Coalition that includes MA Dept of Energy Resources	New England Heat Pump Accelerator *	90,000,000
Sublime Systems, Inc	First Commercial Electrochemical Cement Manufacturing	86,900,000
City of New Bedford	EPA Superfund grant	72,700,000
MA DEP	MA Clean Water State Revolving Fund Grant	70,769,000
MBTA	Green Line Station Upgrades at 14 stops along the Green Line	67,609,672
MBTA	Symphony Station Renovation and Accessibility Improvements	66,602,931
	*5 States in New England will share a \$450 million grant for this project, so this report assumes at least \$90	

**Key Finding #11: The largest award in the nation is a \$4.7 billion grant to Maryland to replace the Frederick Douglas Tunnel to improve rail service and upgrade stations near Baltimore.**

The Hudson Tunnel Project between New York and New Jersey will receive \$3.8 billion. California won a \$3 billion grant for high-speed rail and another \$3 billion award that is shared with Nevada. Maryland also won another \$2 billion award for the Susquehanna River Bridge replacement.

State	Project Name	Awarded Amount
Maryland	B&P Tunnel Replacement Program: Frederick Douglass Tunnel	4,707,571,556
New York & New Jersey	Hudson Tunnel Project Systems and Fit Out	3,799,999,820
Texas	BEAD State Allocation	3,312,616,455
California	California Inaugural High-Speed Rail Service Project	3,073,600,000

Missouri	BEAD State Allocation	1,736,302,708
New York	Penn Station Access	1,643,579,904

**Key Finding #12: Massachusetts did not receive any money from several grant programs that have already distributed over \$60 billion. If Massachusetts had received 2% in these programs—the same rate of success as all other infrastructure grant programs—this would mean an additional \$1.2 billion for infrastructure projects in the Commonwealth.**

The report did not investigate whether Massachusetts submitted applications to all these programs in the past two years, but it recommends pursuing these programs in future grant rounds over the next three years, especially in the two large Passenger Railroad programs which have already distributed over \$24 billion for intercity rail projects, (i.e., Amtrak infrastructure). Here is list of federal programs that have awarded over \$100 million in grants nationwide, without any funding going to Massachusetts.

## **Chapter 2: Key Recommendations**

### **1) Concentrate on the grant programs where Massachusetts has not yet received funding and the federal agencies where the Commonwealth is currently underperforming.**

To continue the recent momentum of the last year, Massachusetts should focus on grant programs where we are not currently winning our fair share. By learning from these missed opportunities, Massachusetts can capitalize on future grant rounds.

For nearly every competitive grant program funded by the BIL and IRA, there will be multiple opportunities to secure additional funding over the next three years. Massachusetts showed significant progress in 2023 by learning from missed opportunities in 2022. During the first year of the BIL grants, Massachusetts applied to three different programs for the Cape Cod Bridges, and once for the I-90 Allston Multimodal Project. These 2022 applications requested over \$3 billion in federal funds, but unfortunately only resulted in \$1.6 million of federal grant funds to study the Cape Cod Bridge project.

In 2023, under the leadership of Governor Healey and her federal funding infrastructure team, Massachusetts learned from these failed applications and produced stronger arguments in the second grant round. This second round resulted in Massachusetts winning over \$1.7 billion combined for the Sagamore Bridge and the I-90 Allston Multimodal Project.

Understanding where the Commonwealth is not winning grants can be a key strategy for future success. The biggest opportunity should be in the [Intercity Passenger Rail program](#), where the BIL included \$24 billion over five years for the rail improvements in the Northeast Corridor, the network of railways between Washington D.C. and Boston. Last year, the Federal Railroad Administration (FRA) announced over \$16 billion of projects, but unfortunately no projects are in Massachusetts. The Commonwealth should be well positioned to take advantage of future grant rounds so that Massachusetts' rail system is not shutout from this large infrastructure grant program. A similar approach is justified for the FTA's Capital Infrastructure Grants (aka New Starts program), and the Federal Transit Administration's Rail Vehicle Replacement Program.

In terms of federal agencies, Massachusetts is showing great success with the U.S. Department of Transportation, but Massachusetts ranks 47th with funding from the U.S. Department of Commerce grants, 33rd with the Department of Agriculture, and 30th with funding from the U.S. Army Corp of Engineers.

## **2) Create state matching funds to help improve future grant applications.**

Governor Healey proposed a plan to transfer \$800 million from the state's Rainy Day Fund to a dedicated fund for federal infrastructure grant matching funds. Both the House of Representatives and Senate passed different versions of this bill (H.4446 / S.2554), but it has not yet completed the legislative process. This bill would significantly help the Commonwealth win federal money, if it becomes law.

Whenever the Commonwealth applies for a federal grant, the federal agencies evaluate if state funds are available to support the state's commitment to a project. Part of the reason why the Commonwealth fared so poorly is the first round of grant applications submitted in 2022 is the U.S. Department of Transportation did not feel Massachusetts could afford the matching funds for the Cape Cod Bridges and the I-90 Allston Multimodal Project. In 2023, when MassDOT reapplied for funding under the Healey-Driscoll Administration, the state applications addressed this concern by showing the federal government stronger state finance plans for these large projects. The application for I-90 Allston Multimodal Project contained a new finance plan that included some funding from the newly enacted Millionaire's Amendment/Fair Share surtax. As stated previously, the applications resubmitted by the Healey-Driscoll Administration ultimately led to \$1.7 billion in federal funds for the two projects.

If Massachusetts state government creates another dedicated fund to match future federal grants, it will greatly improve the Commonwealth's standing when applying for grants in the next few years.

## **3) Support future grant applications by getting projects "shovel-ready"**

Both the BIL and IRA offer five years of competitive grant opportunities. Many of these federal grant programs are still in the second or third years of this five-year plan. This means that Massachusetts can pursue numerous opportunities to secure federal grants for big projects.

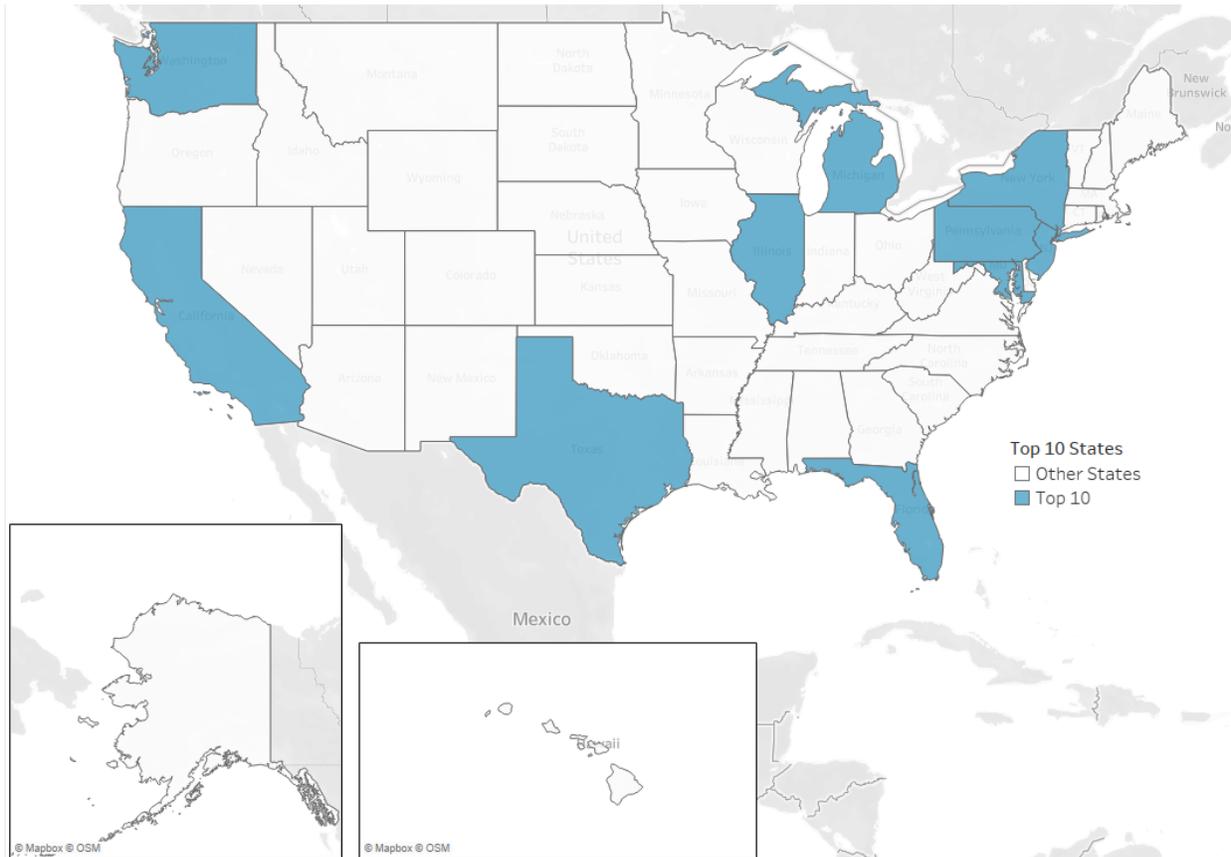

The Massachusetts State government capital plan that allocated state resources to agencies like MassDOT, the Executive Office of Energy and Environmental Affairs, and other executive branch agencies can help improve upcoming grant applications by getting projects aligned with the timelines associated with federal grant programs. The state capital plan can accelerate early design and permitting for any project that will seek federal grants in the BIL and IRA grant programs.

By investing in this design work for projects that will eventually seek federal grants, or for the projects that have previously applied but failed to win federal money, Massachusetts would significantly increase its chances of success in future grant rounds and ultimately see likely see high return on the initial state capital fund's investment.

## Appendix A: Detailed List of Grants Awarded to Massachusetts

This shows all competitive infrastructure grants and discretionary spending awarded to Massachusetts from the BIL and IRA that are larger than \$1 million, sorted by award size.

Applicant Name	Project Name	Awarded Amount	Agency	Grant Program
MassDOT	Sagamore Bridge Project	993,122,325	USDOT	Bridge Investment Program
MassDOT	Sagamore Bridge Project	371,870,542	USDOT	MEGA
MassDOT	I-90 Allston Multimodal Project	335,374,775	USDOT	Reconnecting Communities & Neighborhoods
MA Department of Energy Resources	Massachusetts' Solar for All Program	156,120,000	EPA	Solar For All
MassTech	Broadband Equity, Access, and Deployment (BEAD) State Allocation	147,422,464	Commerce	Broadband Equity, Access, and Deployment (BEAD) program
MBTA	Purchase of New Battery-Electric Buses to Replace Older Diesel Buses	116,000,000	USDOT	Low or No Emission Vehicles Program
MassDOT	Connecting the Commonwealth: Early Actions for the Inland Route Project (West-East Rail)	108,085,280	USDOT	Consolidated Rail Infrastructure and Safety Improvement Program
Coalition that includes MA Dept of Energy Resources	New England Heat Pump Accelerator *  *5 States in New England will share a \$450 million grant for this project, so this report assumes at least \$90 million will go to MA	90,000,000	EPA	Climate Pollution Reduction Grants

<b>Applicant Name</b>	<b>Project Name</b>	<b>Awarded Amount</b>	<b>Agency</b>	<b>Grant Program</b>
Sublime Systems, Inc	First Commercial Electrochemical Cement Manufacturing	86,900,000	Energy	Industrial Demonstrations Program (IDP)
City of New Bedford	New Bedford Superfund Remediation	72,700,000	EPA	Superfund Remediation
Mass Clean Water Trust / MA Department of Environmental Protection (MA DEP)	Clean Water State Revolving Fund projects	70,769,000	EPA	Clean Water State Revolving Fund Supplemental
MBTA	Upgrades and Accessibility Improvements to Station Platforms along the Green Line's B and C Branches	67,609,672	USDOT	All Stations Accessibility Program
MBTA	Symphony Station Renovation and Accessibility Improvements	66,602,931	USDOT	All Stations Accessibility Program
Mass Clean Water Trust / MA DEP	Drinking Water State Revolving Fund - Lead Pipe Replacement	65,783,000	EPA	Drinking Water State Revolving Fund Lead Service Line Replacement
MA Department of Energy Resources	Power Up New England *  *6 States in New England will share a \$389 million grant for this project, so this report assumes at least \$64.8 million will go to MA	64,890,959	Energy	Grid Resilience and Innovation Partnerships (GRIP) Program
Massport	Logan Airport Terminal E Renovations	62,000,000	USDOT	FAA Terminal Improvements
Mass Clean Water Trust / MA DEP	Clean Water State Revolving Fund Projects	60,428,000	EPA	Clean Water State Revolving Fund Supplemental
Pioneer Valley Transit Authority	Electrification and Modernization of Cottage Street Bus Facility and the Bus Bay Expansion Project at the UMass-Amherst Bus Maintenance Facility	54,000,000	USDOT	FTA Buses and Bus Facilities

<b>Applicant Name</b>	<b>Project Name</b>	<b>Awarded Amount</b>	<b>Agency</b>	<b>Grant Program</b>
Cities of Chelsea and Everett	Cities of Chelsea and Everett – Island End River Coastal Flood Resilience Project	50,000,000	FEMA	Building Resilient Infrastructure and Communities (BRIC)
Generac Grid Services	Accelerating Building Thermal Electrification While Managing System Impacts	49,835,370	Energy	Grid Resilience and Innovation Partnerships (GRIP) Program
Electric Hydrogen Co.	Manufacturing Innovations for Scaling Green H2 to Fossil-parity	46,300,300	Energy	Clean Hydrogen Electrolysis, Manufacturing, and Recycling Activities
Mass Clean Water Trust / MA DEP	Drinking Water State Revolving Fund Grant	45,206,000	EPA	Drinking Water State Revolving Fund Grant
DOER	Installation of a renewable energy-powered microgrid at the Barnstable High School and Intermediate School Complex	42,328,000	Energy	Transmission Siting and Economic Development Grants Program
Mass Clean Water Trust / MA DEP	Drinking Water State Revolving Fund Grant	41,750,000	EPA	Drinking Water State Revolving Fund Grant
MBTA	Purchase of New Battery-Electric Buses to Replace Older Buses	40,000,000	USDOT	Low or No Emission Vehicles Program
Mass Clean Water Trust / MA DEP	Assistance for Small and Disadvantaged Communities Drinking Water Grant Program	38,204,000	EPA	Assistance for Small and Disadvantaged Communities Drinking Water Grant Program
City of Salem	Salem Wind Port Project	33,835,953	USDOT	Port Infrastructure Development Program (PIDP)

<b>Applicant Name</b>	<b>Project Name</b>	<b>Awarded Amount</b>	<b>Agency</b>	<b>Grant Program</b>
