BITS Energy Saving Smart Strip Surge Protectors

Large Energy Saving Child Safety Smart Strip Surge Protection Series

The CCG Child Safety Energy Saving Smart Strip Series

This series was design for people with children. Not only are you getting a top of the line surge protector, but this unit has sliding outlet covers so young children cannot stick things in them when their not being used. On top of that your also getting the Smart Strips' automatic switching functionality which will save you money.

Features: 6' White Cord, 10 Color Coded Outlets, 3,600 Joules Surge Protection

Choose from 2 variations to suit your needs!

Available Standard Model; Additional Phone/Fax-line Protection

Item Details: CCG4 \$/ 3 99

Available Standard Model; Additional Phone/Fax-line, Cable/Satellite-wire and Ethernet cable Surge Protection

Item Details: CCG5 \$/ 3 99

Large Energy Saving Smart Strip Surge Protection Series

The Original LCG Energy Saving Smart Strip Series

The essential workhorse of the Smart Strips. The LCG series was designed to save the user time, energy and money without having to change anything about your current usage habits. The Smart Strip works by monitoring the power increase or decrease, by turning a device ON or OFF, through The 'Control' outlet. Then based on the change of the power draw through that outlet the Smart Strip will automatically supply or remove power, respectively, to the devices the user wants to save energy on.

Features: 6' White Cord, 10 Color Coded Outlets, 1,950 Joules of Surge Protection

Choose from 3 variations to suit your needs!

Available Standard Model

Item Details: LCG3 \$/ 3 99

Large Entertainment Center Energy Saving Smart Strip Surge Protector

Ten outlets work together, autoswitching your devices on/off automatically, to save you money on your electric bills. The level of surge protection provided by the LCG6 will keep your equipment safe from even the harshest power spikes. With the conveniently-spaced outlets and automatic switching, the Smart Strip is a

friendly addition to any electronic system.

Features: 6' Black Cord, 10 Color Coded Outlets, 6,000 Joules Surge Protection

Available! Standard Model; Additional Phone/Fax-line, Cable/Satellite-wire and Ethernet cable Surge Protection

Item Details: LCG6 \$/ 3 99

Large Wireless USB Remote Controlled Energy Saving Smart Strip

The LUG7 Smart Strip is a wireless USB Smart Strip surge protector. When the USB remote is connected to a device's USB port, it detects power on that USB port and wirelessly controls the "Energy Saver" outlets on the LUG7 Smart Strip Surge Protector accordingly. Alternatively the USB remote has a button that can also be used to turn the "Energy Saver" outlets ON or OFF manually. This makes the LUG7 Smart Strip wireless USB surge protector an ideal addition to our Energy Saving Surge Protector line.

Features: Heavy Duty 4' White Cord, 8 Color Coded Outlets, 2,160 Joules Surge Protection, 2 USB Charging Ports

Custom Smart Strips

In some unusual cases some devices will not work as the 'Control' device of the standard model Smart Strips. In this instance we have created some custom models, for example The LUG. This is just one example of our custom units. Be sure to research all options before making a purchase and if there are any questions please feel free to contact us.

What Can I Save Money On?

The Smart strip can be used to save energy on computer systems, office setups and home entertainment systems mostly. They can also be used to automate lights & vacuums on your shop equipment and various other situations around homes and offices. With our wide variety of models and uses the Smart Strip can be a valuable asset to any home or office. Some devices do not make suitable 'Control' devices for the Smart Strip. Explore all models and ask us questions to find the best fit for you so you can start saving energy and money!

USB Controlled Energy Saving Smart Strip

The LUG series of Smart Strips

The LUG series of Smart Strips is exactly the same as the LCG series, with one difference: these feature a USB port that senses voltage (NOT serial data) and turns your equipment on or off based on the strength of the current. So, if there is no USB current, everything turns off. It's an alternative to the standard power-sensing device when your computer setup needs it.

Item Details:  LBG4

Available Brownout Protector, Additional Phone/Fax-line and Cable/Satellite-wire Surge Protection

Item Details:  LBG5

Dual Voltage Surge Protector

This is not an energy saving surge protector!

The Dual Voltage Surge Protector was designed for those who travel out of the country a lot. This surge protector will operate on either 110V or 220V, as the name suggest, electric grids to surge protect your electronic devices. To use this outside of the US you may need to get a plug-to-outlet converter. The benefit is that you can take your North American (NA) Standard electronic devices out of the US with only the SVG and one, instead of many, plug-to-outlet converter. This is possible because the SVG will use the one converter so it can be plugged into the foreign outlets while it's outlets are the NA outlet standard so you can plug up to 6 NA devices into it.
